

Garbage Strap™ Installation Instructions v.1.2

Tools needed: None!

- No Tools Needed
- No Drilling
- Nothing to screw on
- 2" wide elastic strap

Scan for Garbage Strap Installation Video >

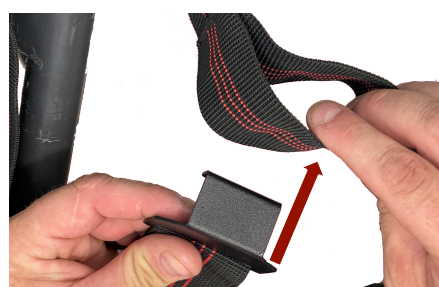

As easy as 1, 2, 3!

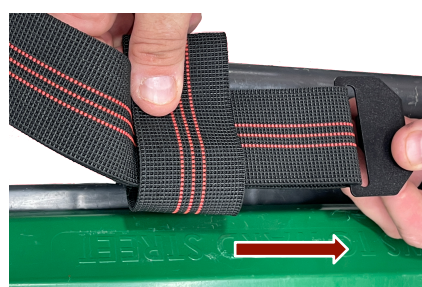

Step 1- Feed strap through rear handle (A) or center knuckle (B)

A: Feed through handle or center knuckle

- Slide facing down
- Loop should be towards front of the garbage can

B: Slide hook through loop

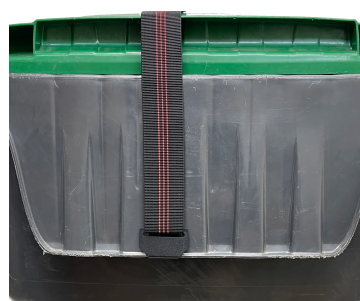

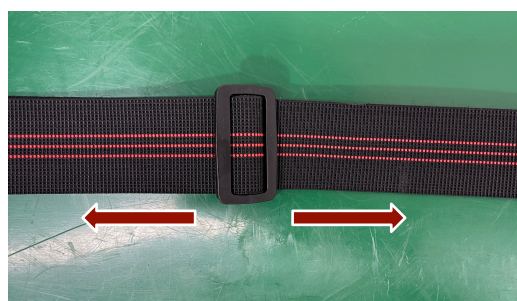

C: Pull tight

Step 2- Adjust accordingly

- We suggest you lay your strap out to get an idea on how much needs to be adjusted

End result should look like this

Step 3- Attach bracket to desired location

- You have multiple options to attach your hook

TO PREVENT DAMAGE TO GARBAGE TRUCK

When the garbage strap is not in use you can strap it to the lid (A) or to the back wheel axle (B) (if applicable)
